Always be on the lookout for trail groomers on Utah's trails. Ride under control at all times.

An adult should accompany and supervise operators ages eight through 15 at all times.

When operating snowmobiles on public roads, trails, or lands, please observe the following rules:

- No one under eight years of age may operate a snowmobile on public roads, trails, or lands.
- Utah resident operators ages eight through 15 must possess an OHV education certificate for snowmobile use in order to legally operate a snowmobile on public property.
- Resident operators 16 years of age or older must possess a valid driver's license or an OHV education certificate.

For more information on obtaining an OHV education certificate, please contact the Division of Utah State Parks and Recreation at 1-800-OHV-RIDE.

Safety Tips

- Let someone know where you're going and when you expect to be back. Never ride alone.
- Be familiar with your machine. Know its fuel capacity and basic maintenance procedures.
- Carry extra spark plugs, extra drive belt, a tool kit, and a survival kit.
- Watch your fuel supply. Ride out only to a point where your fuel gauge reads one-half; then follow your tracks back to the trailhead.
- Ride on the right side of the trail, giving the uphill bound machine the right of way. Be careful not to follow other snowmobiles too closely.
- Dress for changing weather conditions. Layered clothing allows riders to adjust to changing temperatures and conditions.
- Check the weather and avalanche danger forecasts to avoid potentially dangerous situations.
- Never harass or chase wildlife.
- Use headlights and taillights in both daylight and darkness.

Nebo Loop Complex provides outstanding snowmobiling opportunities December through March. Elevations reach 9,200 feet, making the scenic panorama breathtaking. Trails provide access to excellent winter scenery and enjoyable play areas including the Mt. Nebo high-tops/wilderness area, and the Wasatch Range.

Access to the complex is provided through the Payson and Salt Creek canyon trailheads. Services along this trail are limited, and snowmobilers should plan to take extra food and fuel.

There are many ungroomed and unsigned side trails in the area. Riding in the mountains of Utah presents some unique life-threatening winter hazards. Due to the steepness of the terrain, there is a risk of avalanche in these areas and snowmobilers should take appropriate precautions.
